## **Hydrogen Energy is now here**

### *As shown on the Hanover Fair*

During the Hanover Fair 99 (19. to 24. April 1999) there will be the fifth joint presentation on hydrogen and fuel cells. This year again it will offer an unique opportunity to be informed about hydrogen as energy carrier and fuel cells as the corresponding optimum transformation technology. Both will be key elements in the energy economy.

The fuel cell in particular has already an impact on energy technology and economy, both for stationary and mobile applications.

**A particularly suggestive example for the mobile field will be a London taxi equipped with hydrogen gas as fuel, a fuel cell as energy transformer, and an electric motor. The Belgian company [Zevco](#) will provide VIP transport with it in Hanover.**

20 other exhibitors from Germany and abroad will present the whole range of the field. One participant of the joint presentation will be the German Hydrogen Association.

**You find the booth J04 "Hydrogen Technologies and Fuel Cells" on the Research Market in Hall 18, 1st floor. During the fair the exhibitors can be reached by phone (+49-511) 89-47683 and fax -47684. Before and after please contact us or Arno A. Evers PR-Beratung, phone (+49-8151) 99892-3, fax -43, E-Mail [arno@fair-pr.m.uunet.de](mailto:arno@fair-pr.m.uunet.de).**
