<p>We appreciate his ability in creating effective and relevant interactions between stakeholders, leading to a better visibility of ISO/TC 197 work and the enlargement of the representativeness of involved parties.</p> <p>Nonetheless, despite this remarkable and valuable impulse, the subsequent multiplication of parallel meetings complicates the follow-up of all the on-going activities.</p> <p>We appreciate TAB inputs as an appropriate support for the contextualization and the understanding of what the stakes are, and finally as a relevant support for decisions.</p>		

We appreciate his availability and reactivity whenever we contact him for information and recommendation.

Dr Tchouvelev has shown strong, and fair leadership over any issues encountered, whilst looking to expand the projects taken on by ISO/TC 197 where appropriate. The UK is pleased to understand that Dr Tchouvelev's re-nomination was successful and that he will continue as ISO/TC 197 Chairman until December 2018.

The benefit of the TAB is made unclear by cross-over between roles of TPD (Technical Program Directors) and the Technical Advisory Board.

The involvement of TPD's in the working group is critical to help identify areas of concern early, and assist preparation of working group output with the confidence that ISO/TC 197 will be accepting of the content.

Concerns have been raised on occasions over the steering of the output of a working group towards the view of the TPD/TAB member, rather than necessarily following the consensus of the working group.

It is also concerning to see on occasions statements that refer to the TAB as regional representatives when regional consensus is not represented by a member of the TAB.

The minutes from the 2014 meetings of ISO/TC 197 had not been written and circulated at the time of the UK preparations for the 2015 plenary, but it is noted that these have since been prepared (which otherwise would have been completely unacceptable). It would be more useful to have these earlier in the year, in line with the already well established ISO timescales.

In addition, the ISO/TC 197 Secretary is to be reminded that all committee business should be conducted using N documents which have to be uploaded to ISO Livelink so that all Member Bodies can see them and traceability is ensured. It is not acceptable to carry out committee business by referring to documents that have not been circulated and uploaded to ISO Livelink as they have no traceability for Member Bodies and they cannot be accessed . If the present ISO Secretary were to change, traceability will be lost completely.

Support for the working group management however has been good, and is much appreciated.

We greatly appreciate the turn-around since the previous regime change. Andrei clearly works behind the scenes to resolve issues, but sometimes additional dialogue with stakeholders would be helpful before making decisions.

The TAB recommendations provide useful insight on NWIPs and other issues, but opportunity for dialogue in advance of recommendations would be helpful so that any concerns could be addressed.

Minutes from the 2014 plenary finally came out, 7 months later than promised. Responsiveness and sense of responsibility need improvement.
