Nomination of Guy de Réals as acting Co-Convenor of WG 24

Guy Dang-Nhu recently informed TC 197 that he has accepted a position in a new field within Air Liquide and he is resigning as Co-convenor of WG 24. We would like to thank Guy for his tremendous contribution to TC 197, both as Co-convenor of WG 24 and as the head of the French delegation at the plenary meetings over the last few years. It was a pleasure for us to work with him and he made important contributions to the development of the ISO/TS 19880-1.

As per our established tradition, the countries submitting a NWIP have the prerogative to nominate initial and replacement convenors for all active WGs. Therefore, being that the initial NWIP that brought about the creation of WG 24 was jointly submitted by France and USA, we asked France to nominate a replacement for Guy Dang-Nhu. They, in turn, confirmed their desire to continue to provide leadership for WG 24 and proposed the nomination of Guy de Réals from Air Liquide as the replacement of Guy Dang-Nhu. As most of you are aware, Guy de Réals has been involved in WG 24 for a while and he is also very involved in the development of the European standard for fueling stations.

In order to provide continuity in the leadership of WG 24, please be informed that we have decided to name Guy de Réals as acting co-convenor of WG 24, until such time that he can be formally approved by TC 197. The approval process will involve a TAB review and a CIB, which will be done as soon as possible.

Jim Ferrero and Andrei Tchouvelev
