

Results of the consultation carried out on IEC/CD 62282-3-2 *Fuel cell technologies — Part 3-2: Stationary fuel cell power plants — Test methods for the performance* (ISO/TC 197 doc. N 224)

information to P-members, O-members and liaisons

Dear members,

Please find enclosed the results of the consultation carried out on IEC/CD 62282-3-2 *Fuel cell technologies — Part 3-2: Stationary fuel cell power plants — Test methods for the performance* (ISO/TC 197 doc. **N 224**). The table of replies is included in Annex 1. The comments received are included in Annex 2.

As you will see in Annex 2, the comments received have already been reviewed with the Chairman of ISO/TC 197. As the plenary meeting of IEC/TC 105 will be held at the same time as the ISO/TC 197 plenary meeting, we did not want to delay the IEC/TC 105 work by having a discussion at the ISO/TC 197 plenary meeting. This is why all the comments have been reviewed to come up with a consolidated ISO/TC 197 position.

This ISO/TC 197 consolidated position, which is given in Annex 3, has already been forwarded to the IEC/TC 105 Secretariat. Should you have any comments or questions regarding the ISO/TC 197 consolidated position, please do not hesitate to contact us.

Yours sincerely,

Sylvie Gingras, Secretary of ISO/TC197
Bureau de normalisation du Québec
on behalf of the Standards Council of Canada

Enclosures (Annexes 1 to 3)
