

Call for experts – ISO/TC 197 WG 11 and WG 13

Interested parties are invited to contact the ISO/TC 197 Secretariat by **28 February 2006**

Dear members,

As discussed at the last ISO/TC 197 plenary meeting, ISO/TC 197 is inviting hydrogen experts to join its working groups WG 11 which deals with gaseous hydrogen refuelling stations and WG 13 for hydrogen detectors.

Specifically, ISO/TC 197 WG 11 is looking for experts that are involved in the design, manufacture or installation of hydrogen infrastructure.

ISO/TC 197 WG 13 is looking for experts that are concerned with hydrogen detection in stationary applications. The working group would benefit from the expertise of individuals representing manufacturers and users of hydrogen sensors.

Should you be interested in becoming a member of one of these ISO/TC 197 working groups or require further information, please contact the ISO/TC 197 Secretariat (sylvie.gingras@bnq.qc.ca) by **28 February 2006**.

Yours sincerely,

Sylvie Gingras, Secretary of ISO/TC197
Bureau de normalisation du Québec
on behalf of the Standards Council of Canada
