

**Progress report of WG 5 Compressed hydrogen surface vehicle refuelling connection devices
Report for the ISO/TC 197 plenary meeting on 10 November 2005**

WG number	Convener	Country	Joint WG with
5	Livio Gambone	Canada	ISO TC 22
WG meeting dates and location since the last plenary meeting on 2 July 2004			
Annecy, France (Staubli Headquarters) – Feb. 21-22, 2005; Troy, MI (SAE Headquarters) – May 10, 2005; Palm Springs, CA (Wyndham Hotel) – Nov. 8, 2005			

Project Identification		Proposed changes in title or scope if any	
ISO/DIS 17268		None	
Stage	Agreed target dates for the next stage	Proposed revised target dates	Remarks
Current stage: ISO/DIS Next stage: ISO/FDIS	CD: DIS: FDIS: IS: 2006/03		FDIS vote November 2005
Issues to bring to the TC, if any (inadequate membership representation, technical directions, etc)			
<p>The FDIS vote will take place in November 2005. The document to be voted upon will be the original SAE J2600 standard published in October 2002, and will only include editorial comments agreed to at the Grenoble Joint WG5 meeting.</p> <p>The Joint WG5 has held three meetings since the last plenary session, and the convener has attended two SAE J2600 meetings in the interest of eventually harmonizing the two documents. Once the FDIS is approved in early 2006, the Joint WG5 will continue to meet in order to resolve the outstanding technical issues and to harmonize with SAE J2600. As soon as this follow-on work is complete, the intent will be to immediately re-publish ISO 17268 with the appropriate technical changes.</p> <p>Livio Gambone – November 8, 2005</p>
