The comments received from the DTS circulation will be forwarded to the ISO/TC 197 WG 12 for its consideration in the preparation of the Draft International Standard (DIS). After reviewing the comments received with the ISO/TC 197 Chairman, it was felt that these comments should be considered in the next phase of the development of the International Standard. In particular, the WG will have to pay a special attention to the test methods, which will need to be further refined before the publication of the International Standard.
