

ISO/TC 197 ad hoc group on vehicular hydrogen fuel systems

information to P-members, O-members and liaisons

Dear members,

As agreed at the last plenary meeting of ISO/TC 197 in Montecatini Terme, an ad hoc group on vehicular hydrogen fuel systems is being formed under the leadership of the ISO/TC 197 Chair. This ad hoc group will be responsible for preparing a strategy paper on how to move forward with the development of an international standard on hydrogen fuel systems for land vehicles.

P-members are invited to nominate experts interested in joining this ad hoc group. Through this exercise, we are asking you to identify experts that are deeply interested in this topic i.e. OEMs, fuel tank manufacturers, components manufacturers and regulators.

At the same time, we encourage the P-members to share any information (test report, analysis) that would facilitate the work of this ad hoc group.

Please provide to the ISO/TC 197 Secretariat the contact details of your experts and any relevant information on this topic by **4 April 2008**.

Yours sincerely,

Sylvie Gingras, Secretary of ISO/TC197
Bureau de normalisation du Québec
on behalf of the Standards Council of Canada
