

## ISO/TC 197 ad hoc group on Hydrogen Vehicle Fuel System (HVFS)

information to P-members, O-members and liaisons

Dear members,

Further to ISO/TC 197 doc. **N 395**, we are pleased to provide you with the list of experts that have been nominated by the ISO/TC 197 member bodies to join the rank of the ISO/TC 197 ad hoc group on Hydrogen Vehicle Fuel System (HVFS).

This ad hoc group, which is being led by the ISO/TC 197 Chair, is responsible for preparing a strategy paper on how to move forward with the development of an international standard on hydrogen vehicle fuel system. More specifically, the ad hoc group will recommend the scope, coverage as well as the safety issues to be included in the development of an international standard.

The ISO/TC 197 Chair would like to have more automotive OEM's, manufacturers of onboard components and other stakeholders involved in this work so that they can actively contribute to the approach that will be proposed as part of the strategy paper. P-members are therefore invited to consult with their automotive sector in an effort to nominate additional experts from these groups of stakeholders. Please provide their contact details to the ISO/TC 197 Secretariat by **26 September 2008**. The first meeting of the ad hoc group is planned for sometime this fall.

Yours sincerely,

Sylvie Gingras, Secretary of ISO/TC197  
Bureau de normalisation du Québec  
on behalf of the Standards Council of Canada
