

June issue of ISO Focus - *Creating modern regulations for the transport of dangerous goods*

Dear members,

We are pleased to forward you a copy of the article *Creating modern regulations for the transport of dangerous goods* that appeared in the June issue of the ISO Focus magazine. This article, which was jointly written by Chris Jubb, Chair of ISO/TC 58 *Gas cylinders* and Randy Dey, Chair of ISO/TC 197 *Hydrogen technologies*, highlights the success story of the publication of ISO 16111 *Transportable gas storage devices — Hydrogen absorbed in reversible metal hydrides*.

It explains how the close collaboration of ISO and the UN *Sub-Committee Experts on the Transport of Dangerous Goods* (SCETDG) ensured the standard's place in the UN Model Regulations commonly known as "*The Orange Book*" and contributed to the removal of a potential technical barrier to trade.

Yours sincerely,

Sylvie Gingras, Secretary of ISO/TC197
Bureau de normalisation du Québec
on behalf of the Standards Council of Canada
