Re: FprEN ISO 19884

Dear Laurie, Stephen and Warren:

Unfortunately, due to the Disapproval of the FDIS ballot for ISO/FDIS 19884, as well as the timeframe limitations at this time for the ISO project, ISO/TC197 would like to invite CEN/TC 23 to proceed with final processing of the CEN project that had been developed in parallel as part of the Vienna Agreement.

TC197 will need to cancel the ISO project at this time, but will consider its options to adopt the published CEN standard or participate in a future revision.

Please keep us updated on the progress. Thank you.

Please do not hesitate to contact Andy Dryden or us if you need assistance in this matter.

Yours sincerely,
