ECMA Liaison report for ISO 197 for 2019 - 2019-12-10

Document type: Other committee document

Date of document: 2019-12-10

Expected action: INFO

Background: Please find attached the ECMA Liaison report for the 2019 plenary.

Committee URL: <https://isotc.iso.org/livelink/livelink/open/tc197>

Kempen, Germany 10th Dec.2019

To the Secretary of ISO/TC197

ECMA Liaison Report 2018 for ISO TC 197

ISO TC197 plays an important role for ECMA and its members. The standardization of gas cylinders and pressure receptacles for the transport and stationary storage of compressed Hydrogen have enormous importance to us cylinder manufacturers.

We are interested in the standardization projects of:

- WG-15 - "Gaseous hydrogen — Cylinders and tubes for stationary storage".
- WG 18 - "Gaseous hydrogen – thermally activated pressure relief devices for compressed hydrogen vehicle fuel containers".
- WG-24 – "Gaseous hydrogen fueling stations – General requirements
- WG-25 - "Transportable gas storage devices -- Hydrogen absorbed in reversible metal hydride".

ECMA is therefore very interested to continue the liaison with ISO TC 197. Currently we see no areas of concern between ECMA and ISO/TC 197 which need to be addressed.

We wish you a successful plenary meeting in Grenoble.

Klaus Markhoff
ECMA Secretary General
