## FORM 8A: COMMITTEE DECISION FOR DIS

<b>Secretariat</b> SCC	<b>ISO/TC 197 /SC</b> Enter Number  <b>N 1168</b>
<b>Project number and title</b> 19880-5Amd1	

This form shall be submitted, by the secretariat of the committee or subcommittee concerned, to the ISO Central Secretariat when providing the necessary files for DIS (<http://isotc.iso.org/livelink/si/>).

**The accompanying document is submitted for circulation to member body vote as DIS**

**Consensus has been obtained from the P-members of the committee**

TC 197 unanimously proposes to publish this amendment of 19880-5 to clarify 3 minor errors in 2 subclauses. Citing that these changes are clarifications ONLY with no new technical requirements, and citing that they are very limited in scope only to clarify items which were not correctly adjusted before publishing after the FDIS ballot for Document 19880-5, TC 197 requests that this proceeds quickly to FDIS.

<p><b>P-members who did not vote</b></p> <p>The following P-Members were not present at the plenary and were not present for the resolution to proceed:</p> <p>Argentina (IRAM)                  Belgium (NBN)                  Denmark (DS)                  Finland (SFS)                  India (BIS)                  New Zealand (NZSO)                  Russian Federation (GOST R)                  Spain (UNE)                  Sweden (SIS)</p>
<p><b>Remarks</b></p> <p>All P-members present at the last plenary were unanimous that this project move forward to clarify wordings that can easily be misinterpreted by users of 19880-5. These clarifications were present in the final FDIS ballot, but for some reason, these editorial changes were not made.</p> <p>The 19880-5 Amd1 intends to integrate these changes that were accepted by the WG.</p> <p>It is the hope of the WG Convenor, the WG, TC 197, and the CM that this project skip the DIS ballot and move straight to FDIS as no technical changes are made to the document.</p>

I hereby confirm that this draft meets the requirements of [Part 2 of the ISO/IEC Directives](#):
